Forecast for Tuesday 29 Sep 2020

Weather: Largely dry overnight, with just a few light showers. Some valley mist and fog patches. These clearing to leave a fine day on Tuesday with plenty of sunny spells. A few light showers may develop, largely in the west and during the afternoon, though even here most areas will remain dry.

Chance of cloud free mountain/hill tops above 800m: 70% through the early hours with occasional patches around 700m. Clouds generally above the summits from mid-morning onwards.

Visibility: Very good throughout, but locally poor or very poor in any valley fog first thing.

Freezing Level*	1500m	1400m	1500m	1500m	1500m	1500m	1900m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite being the end of September, prolonged exposure to UV during the day could still lead to the risk of sunburn.

Forecast for Wednesday 30 Sep 2020

Weather: Cloud increasing during the early hours, then wet from mid-morning onwards. Outbreaks of rain, often heavy and increasing winds, with gales over the peaks. Rain clearing to heavy showers later by the evening.

Maximum wind: Southerly 35-40mph gusting 45-55mph.

Chance of cloud free mountain/hill tops above 800m: 90% during the early hours, with cloud bases down to 700m at times. 60% during Wednesday morning, falling to 40% from the afternoon onwards. Cloud bases of 600m, occasionally down to 300m.

Visibility: Very good during the early hours, becoming moderate from mid-morning, occasionally poor or very poor in heavy rain and hill fog.

Temperature: **Valleys:** Plus 5 Celsius, rising to plus 15 Celsius.
At 800m: Plus 5 Celsius, falling to plus 3 Celsius by the end of the day.
Freezing level: Above the summits.
